# Home Network Defender

Powered by Trend Micro and Cisco

## SMART PROTECTION FOR YOUR HOME NETWORK

Security software provides essential protection against various Internet threats but sometimes it can also create a hassle if you need to update and manage multiple computers at home. You need a tailored solution that is customized for a home network environment with a wireless router.

## CISCO AND TREND MICRO, YOUR SECURITY EXPERTS

Introducing Home Network Defender, an easy-to-install, easy-to-manage security service for homes with Linksys by Cisco routers. Home Network Defender is designed to protect you and your family against cyber criminals and online predators by stopping the threats at the router “gate” before they can get into your home network.

## FEATURES

Powerful Router security features include:

- **Robust Parental Controls:** Know what content is being viewed by family members; manage what site categories each family member can view. Includes access timers, customizable by user.
- **Safe Web Surfing:** Trend Micro’s unique Web Threat Protection technology is designed to automatically blocks sites identified as malicious. Choose between 3 security level settings to fit your specific browsing needs.
- **Network Activity Reporting:** Easy access to detailed reports highlighting all Internet traffic through your router. Allows your home computer network administrator to know what violations occurred on the home network and who committed them.
- **Quick/Simple:** Download and activate through your Linksys by Cisco router. Because it’s so easy to set-up, view, manage and repair, it’s like having an expert at home, helping you get the most out of your Linksys by Cisco network.

Powerful PC security features from Trend Micro AntiVirus plus AntiSpyware

- On-demand, scheduled, and real-time computer scanning is designed to provide active protection against the latest viruses, worms, Trojan horse programs, and spyware.
- Trend Micro’s advanced behavior monitoring technology helps to prevent suspicious changes from occurring on the computer without your knowledge.
- Provides a simple end-user experience, with quick and easy security setup for up to 4 PCs.

## SOFTWARE

Protection Points

- At Home
- Email, Web Surfing
- Parental Control
- Network Activity Reports
